System Overview

RMD Kwikform’s world class shoring systems have been proven around the globe for their versatility, speed to erect and dismantle, unparalled strength to weight ratios, and effectiveness. Having been used in projects ranging from some of the world’s most iconic structures to the biggest civil engineering projects, and all stages between. RMD Kwikform has consistently demonstrated that the prowess of its products when combined with its world class engineering team creates a winning formula for your projects.

**Faster**
- RMD Kwikform has over 60 years experience in the construction industry. Our Shoring and propping solutions are designed to help you save time and money, either through superior strength to weight ratios or through clever design innovations, and often both in combination.

**Safer**
- All our shoring and propping systems are engineered with safety in mind. Our Engineering and design teams are trained to ensure that our solutions maximise the unique characteristics of each system. Selecting a shoring or propping solution from RMD Kwikform will provide piece of mind, whatever the project that you are working on.

**Easier**
- RMD Kwikform’s versatile shoring solutions have been proven all over the world from huge civil engineering projects to small commercial projects. The versatility of our range of shoring systems is unrivalled in the industry, from heavy duty Megashor, to light weight Alshor Plus, from speedy Rapidshor to dependable Superslim we have the right shoring system for your needs.
Features & Benefits

- **Over 60 years experience**
  With a proven history of providing shoring solutions across the construction industry, from heavy duty shoring to lightweight aluminium shoring and across a huge range of applications, RMD Kwikform is proven to be the ideal partner.

- **Engineering Expertise**
  Recognised for the quality of our engineering, wherever in the world you may be, we will provide the right engineered solution for your requirements.

- **Extensive global network**
  With established operations around the world we are well positioned to help. Continually looking to expand, no matter where your project is located RMD Kwikform should be your number one choice for your shoring requirements.

- **Experienced construction professionals**
  RMD Kwikform understands the pressures of your projects, with safety paramount across our sites we understand the need to provide you with cost effective and efficient solutions.
Alshor Plus

Aluminium Shoring System
Light weight aluminium system that has minimal loose parts, reducing labour requirements

Designed to Save Time and Money on Site
With many time saving and labour saving innovations designed into the system, Alshor Plus will improve your on site productivity.

Quick Strike Load Release Mechanism
Innovative design ensure single strike load release mechanism improves your on site efficiency

High Capacity
With a 120kN maximum leg loading Alshor Plus reduced the number of legs required for your shoring project, saving time and money
Rapidshor

Modular Design
Minimising component count the modular design of Rapidshor makes it quick and easy to erect on your shoring projects. Its versatility makes it the ideal companion to RMD Kwikform's formwork products.

Light but Strong
High strength to weight ratio produces a high leg capacity of 80kN reducing the number of components required on a scheme, and allowing greater jack extensions without bracing.

Regular Patterns of Snap on Braces
Thus reducing erection time and inspection costs, saving you programme time.

Easy Maintenance
The galvanised finish reduces the maintenance requirements of the product and promotes long life of the components.
Megashor

**Heavy Duty**
Designed for axial loads up to 1000kN, Megashor is the ultimate heavy duty shoring and propping system.

**Versatile**
With a range of lengths, a comprehensive set of accessories and the full integration with Superslim Soldiers, Megashor can be configured into just about any arrangement required to support your needs.

**Safe**
Megashor is globally recognised for its proven capabilities and is approved for use by many agencies across the globe for use in live vehicle and rail applications.

**Easy to Use**
Designed to be easy to use and assemble, Megashor is THE heavy duty shoring system.
Kwikstage

**Simple**
Kwikstage Shoring is designed to be simple to erect, to boost on site productivity and safety.

**Versatile**
Kwikstage shoring has a wealth of accessories and components that make it an incredibly versatile steel shoring system, suitable for all kinds of on site challenges.

**Safe**
With the high strength to weight ratio of kwikstage shoring, and the ease of erection and maintenance, it is an incredibly safe shoring system that has been proven in construction projects all over the globe.

**Simple to Maintain**
With no screw threads to worry about, Kwikstage Steel Shoring system is easy to maintain, maximising the life of the product and your investment in the system.
Superslim

**Unparalleled Versatility and Robustness**
Superslim soldiers are the most versatile shoring solution on the market. Robust and easily assembled into towers and beams of almost any length.

**High Yield Steel**
Being made from high yield steel allied with clever profiling design help to ensure high strength to weight ratios.

**Compatible with Other Products**
Standard accessories make the Superslim product range compatible with other RMD Kwikform products to provide shoring solutions to any challenge that you can present us with.

**The Definitive Primary Beam**
The robustness and their compatibility with so many of RMD Kwikform’s products means that Superslim Soldiers are the definitive primary beam in heavy duty shoring applications, supporting concrete slab construction.
Services

Our service sets us apart...

With over 85 years of experience in the temporary works industry we understand the many and varied challenges that our customers face, whatever the size of your project. Whilst our product range provides us with the capability of supporting your project, it is our people that will make the difference.

Sales Support
Our sales team comprises a vast wealth of experience in the sector, helping us to understand your challenges and the opportunities to save you time and money.

Engineered Drawings
You will be provided with technical recommendations and layout drawings showing a level of detail sufficient to enable straightforward on-site erection. For specifically fabricated items comprehensive operating instructions will be provided.

Customer Service
We work with customers on all scale of projects and as such recognise that your requirements are all different. We provide a level of customer service to suit your requirements ranging from on site training to simple reordering of replacement parts.

Technical Expertise
Every project, large or small, requires unique system design. Our highly skilled team of engineers and technical experts will understand first your requirements, and provide a solution designed to exceed these. We do this through approaching projects with an open mind and a desire to provide the most appropriate solution.

Safety
RMD Kwikform prides itself on the inherent safety of our products and the solutions that we design. The construction industry’s greatest asset is its people and we design schemes and solutions with this in mind at all times.
